Summary

My name is Gabriel Ramos, and I am Frontend Developer experienced in native development, React.js and Next.js. As Mobile Developer, my main experience is using React Native to build many important projects for brands and companies, just like e-commerce too.

I have some years of expertise as a developer, working with many technologies like JavaScript, DotNet, PHP, HTML/CSS/Sass, WordPress, and surely always open to learn more and increase my skills. And that experience also includes the more different kinds of projects, just as a large international e-commerce app, universities portal apps, companies websites, events and brands landing pages, CMS systems and etc.

My last job in Brazil was at the largest international e-commerce Company in Latin America - Americanas S.A. -. I worked there as React Native developer, in the Cross Border team, where I built the Soub! mobile app. This Company is the owner of Americanas.com, Soubarato.com, Submarino.com and Shoptime.com.

I had also the opportunity to work as the Main Developer of a team and Scrum Master, and I did a very good job, making great differences that put some companies in a good perspective. That's because I am always looking for auto-increasing, and the result is always seeing the company which I am working at achieving the highest steps.

Experience

Frontend Developer

DEPT®

Apr 2022 - Present (3 months +)
